DETAILED ACTION

1. Upon review of the arguments presented in the Appeal Brief received on 11/27/2006, the finality of the Office Action dated 5/11/2006 is removed, and prosecution on the merits is reopened.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-8,10-14,16-43 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per the most recent interpretation of the Interim Guidelines regarding 35 U.S.C. 101, claims 1-8,10-14,16-43 define non-statutory processes because the claims are toward data structures which are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer (Warmerdam, 33 F.3d at 1361,31 USPQ2d at 1760). Furthermore, computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized (Lowry, 32 F.3d at 1583-1584, 32 USPQ2d at 1035). Lastly, in evaluating claims in view of 35 U.S.C. 101, the "limited to the technological arts" test is no longer valid (see Annex III of the Interim Guidelines).

Art Unit: 2626

4. Claims 1-8,10-14,16-43 are allowed over the prior art of record. The claim limitations that are not met by the prior art of record deal with placing tags that delimit a grammar structure with the grammar tags as part of defining a grammar for speech recognition.
